GEOCHIMICA ET COSMOCHIMICA ACTA

EXECUTIVE EDITORS

PROF. J. A. S. ADAMS. *Department of Geology, Rice University, Houston 1, Texas, U.S.A.*
PROF. C. W. CORRENS *Sedimentpetrographisches Institut der Universität, Lotzestr. 13, Göttingen, Germany*
PROF. L. R. WAGER, F.R.S. *Department of Geology and Mineralogy, The University Museum, Oxford, England*

EDITORS

PROF. L. H. AHRENS *Department of Chemistry, University of Capetown, Rondebosch, Cape Province, South Africa*
DR. S. R. NOCKOLDS *Department of Mineralogy and Petrology, The University, Cambridge, England*
PROF. H. C. UREY, For. Mem. R. S. *University of California, La Jolla, California, U.S.A.*
DR. JOHN VERHOOGEN *Department of Geology, University of California, Berkeley, California, U.S.A.*
DR. E. A. VINCENT, *Department of Geology and Mineralogy, The University Museum, Oxford*
PROF. A. P. VINOGRADOV *Vernadsky Institute, Moscow, U.S.S.R.*

INFORMATION FOR CONTRIBUTORS

I. GENERAL

1. Papers should be submitted to the appropriate Executive Editor—Prof. L. R. WAGER for papers from the United Kingdom and British Commonwealth, and for papers in English from Europe; Prof. C. W. CORRENS for papers in German or French; Prof. J. A. S. ADAMS for papers from the American continents. Papers submitted for publication will naturally be judged from the standpoint of scientific originality and novelty. Technical details of apparatus used in scientific investigation can, however, be presented in brief notes. Critical comments or preliminary results requiring early publication should be submitted as letters to the editors. Where possible, letters should be confined to 500 words. The preparation of progress reports and review articles will be invited by the editors from time to time. The journal appears as independent and complete numbers, which are combined into volumes of about 300 pages.

2. Only papers which have not been previously published can be accepted. Authors must agree not to publish elsewhere a paper submitted to and accepted by *Geochimica et Cosmochimica Acta*.

3. Fifty reprints of each paper are provided free. Additional copies can be purchased if ordered at the time the first proofs are returned. A reprint order form will accompany first proofs.

II. SCRIPT REQUIREMENTS

1. Scripts must be written in one of the three official languages—English, French or German.

2. The script should be typed (not a carbon copy). The text must be ready for printing and should be carefully checked for errors. Authors will receive proofs for correction. The original script plus two copies will assist in expediting publication.

3. Illustrations should accompany the script, mounted on separate sheets. Line diagrams that require to be redrawn should include all relevant details. Half-tone illustrations should be restricted to the minimum necessary. Photographs should be enlarged sufficiently to permit their clear reproduction, and if words or numbers appear on them, two copies should be sent, one clearly printed and the other without inscription. All illustrations should be provided with descriptive legends, which should be given on a separate sheet. Any lettering on diagrams—other than Greek letters, symbols, etc.—should be stencilled and should be sufficiently large and bold to permit reproduction when the diagram has been reduced to a size suitable for inclusion in the journal.

4. References in the text should be given by quoting the author's name and year of publication, i.e. AHRENS (1952). **Full references should be listed at the end of each paper, in alphabetical order, in the following manner:**

AHRENS, L. H. (1952) The use of ionization potentials—I. Ionic radii of the elements. *Geochim. et Cosmochim. Acta* **2**, 155–169.

and should include the full title of the article, standard abbreviated title of the journal, year, volume number and inclusive page numbers.

5. The text of articles submitted should be concise and in a readily understandable style. The technical description of the methods used should only be given in detail when such methods are new. The essential contents of each paper should be briefly recapitulated in an abstract in English. Such an abstract may, however, be submitted by the author in the language of the original typescript for translation into English by the editorial staff.

6. To conserve space, authors are requested to mark less important portions of the paper (such as description of methods, record of experimental results, etc.) for printing in smaller type.

7. Indices of refraction should be denoted by the symbols α, β, γ, ω, ε, n and vibration directions by X, Y, Z, O and E.

PERGAMON PRESS LTD.

HEADINGTON HILL HALL, OXFORD 122 EAST 55TH STREET, NEW YORK 22, N.Y.

CONTENTS

NUMBER 1

A. E. Ringwood: Silicon in the metal phase of enstatite chondrites and some geochemical implications 1

M. Pinta et C. Ollat: Recherchès physico-chimiques des éléments-traces dans les sols tropicaux—I. Etude de quelques sols du Dahomey . . 14

Umberto Colombo and Guiseppe Sironi: Geochemical analysis of Italian oils and asphalts 24

Frank T. Manheim: A geochemical profile in the Baltic Sea 52

Frank S. Grimaldi and Irving A. Breger: Niobium content of soils from West Africa 71

NUMBER 2

W. Blumer and G. S. Omenn: Fossil porphyrins: uncomplexed chlorins in a triassic sediment 81

L. H. Ahrens and R. A. Edge: The K/Cs ratio in some basic rocks . 91

Vagn Buchwald: The iron meteorite "Thule", North Greenland . . 95

John J. W. Rogers and Paul C. Ragland: Variation of thorium and uranium in selected granitic rocks 99

S. K. El Wakeel and J. P. Riley: Chemical and mineralogical studies of deep-sea sediments 110

H. Baadsgaard, J. Lipson and R. E. Folinsbee: The leakage of radiogenic argon from sanidine 147

Geochemical Note:

John A. O'Keefe and Paul D. Lowman, Jr.: New investigations of the Igast "meteorite" 158

NUMBER 3

H. G. Thode, J. Monster and H. B. Dunford: Sulphur isotope geochemistry 159

J. Gordon Erdman and Virginia G. Ramsey: Rates of oxidation of petroleum asphaltenes and other bitumens by alkaline permanganate . . 175

Ian Carmichael and Alison McDonald: The geochemistry of some natural acid glasses from the North Atlantic Tertiary volcanic province . . 189

S. R. Taylor and M. Sachs: Abundance and distribution of alkali elements in Victorian australites 223

C. Dakshinamurti and O. P. Mital: Soil acidity and microelement status 229

FILED IN STACKS

Geochemical Notes:

D. F. C. Morris and F. W. Fifield: Rhenium contents of rocks . . 232

Stuart H. Wilson: pH of a natural hydrothermal solution . . . 233

Book Reviews 236

International Mineralogical Association: Notice 238

NUMBER 4

Yaacov K. Bentor: Some geochemical aspects of the Dead Sea and the question of its age 239

F. T. Bonner, E. Roth, O. A. Schaeffer and S. O. Thompson: Chlorine-36 and deuterium study of Great Basin lake waters 261

R. F. Mueller: Analysis of relations among Mg, Fe and Mn in certain metamorphic minerals 267

H. Fechtig, W. Gentner und S. Kalbitzer Argonbestimmungen an Kaliummineralien—IX. Messungen zu den verschiedenen Arten der Argondiffusion 297

Book Review 312
